DETAILED ACTION

This Office action is response to the applicant's amendment filed on 5/15/03.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1-5, and 7-8, the phrase "would or would be" frequently used by the applicant render(s) the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Toll (US 3,941,159).

Toll teaches insulation assembly for a tubular conduit pipe comprising a cover 16 having a length, a width, first 20, second 22 sides, first 24, second 26 edges. The cover 16 is formed of material 18 of urethane foam or other suitable material (col. 2, lines 25-30)

Art Unit: 3635

being wrapped around pipe 12 and secured by removably fastener means 38 are hook-and-loop 40, 42 disposed at the edges 24, 26 of the first and the second sections. (See figs. 1-3, cols. 2-3).

Toll does not disclose specifically the cover having a thickness of at least $\frac{1}{2}$ ", the length would be approximately 8' and the width would be approximately 11.5".

It would have been obvious to one of ordinary skill in the art at the time the invention was made to have the thickness of at least $\frac{1}{2}$ ", length 8', and width 11.5", since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or working ranges involves only routine skill in the art. The motivation for doing so would have been to provide the insulation for the entire length of the pipe, thus giving protection from exposing to the severe temperature.

Response to Arguments

5. Applicant's arguments with respect to claims 1-8 have been considered but are moot in view of the new ground(s) of rejection.
